WARNING: The MINISTRY of LEISURE has determined that the making FIDDLER'S GREEN Fun Construction models can be addictive.

Printed

Fiddler's Green construction cards are quite accurate representations of actual English houses seasoned with a touch of whimsy.

Jetty houses were symbols of wealth and status. A man who could afford only one jetty on his house would want it to face the main thoroughfare. Important buildings like this Market Hall were jettied on all four sides for maximum effect.

Q: Why is the first thing that comes into your mind at the mention of words like "ray gun" or "laser"? And, just in case you want to build your own special design, you need to build your own special design. And you don't have to be a rocket scientist to assemble it.

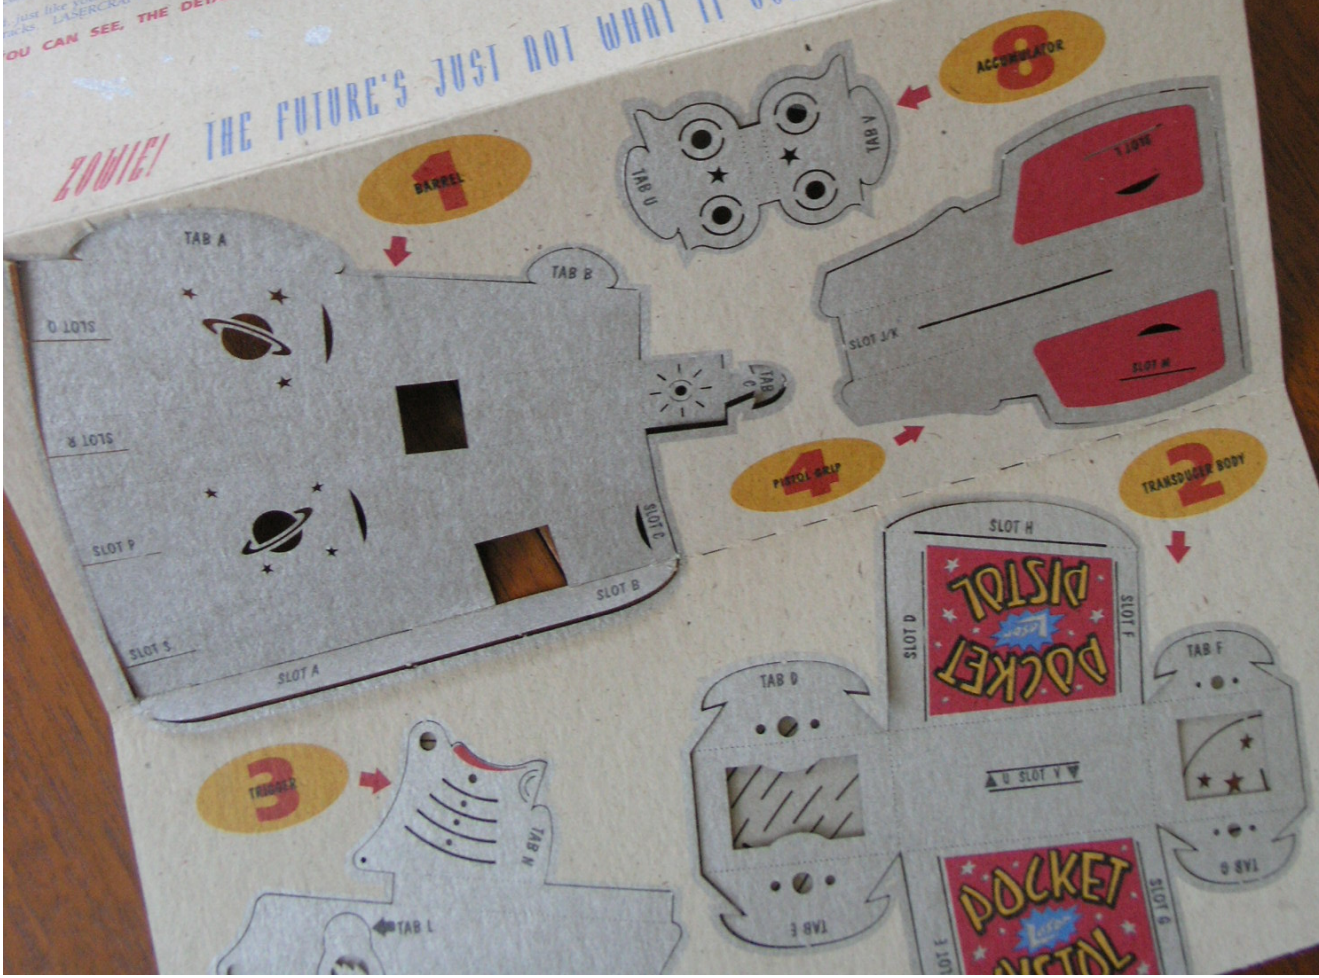

A: You're pondering this little marvel of technology, what do you think it'll be the best way to make a LASER PISTOL out of paper? Of course it'll be just like the patented "Super Paper LASERS" at LASERCRAFT that are designed and built especially to stop any "earthling's" eye.

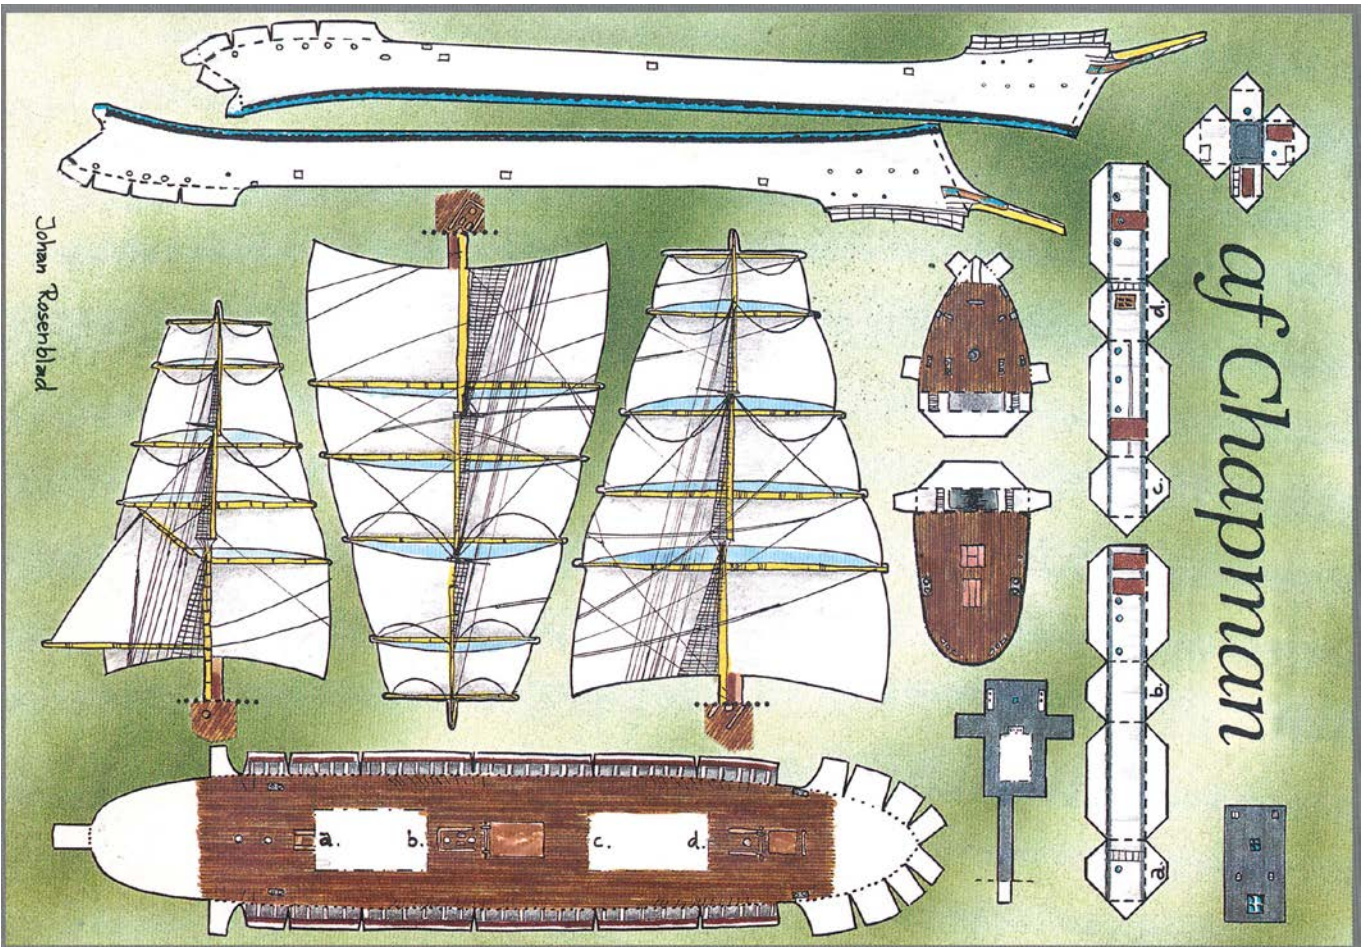

Just like your RAY GUN is guaranteed to stop an alien robot in his tracks, LASERCRAFT'S technology will stop any "earthling's" eye.

YOU CAN SEE, THE DETAIL IS OUT OF THIS WORLD.

Lasercraft®

POW! THE FUTURE'S JUST NOT WHAT IT USED TO BE!

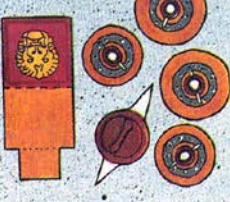

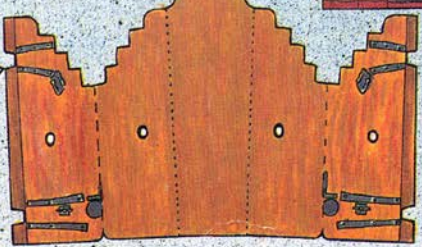

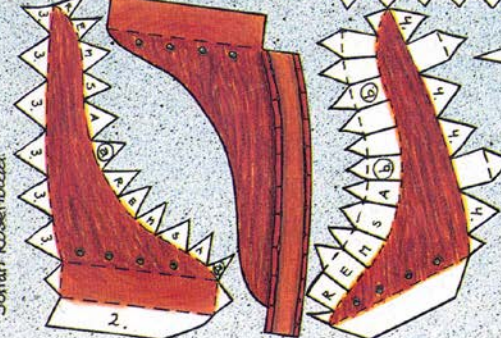

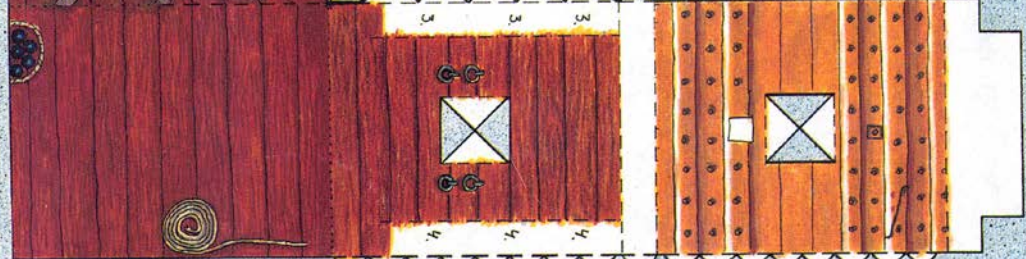

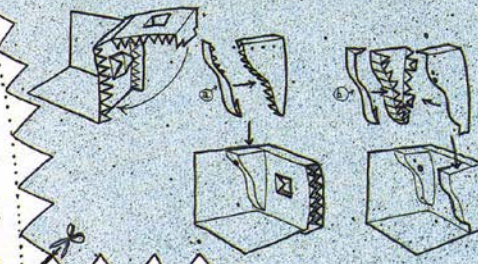

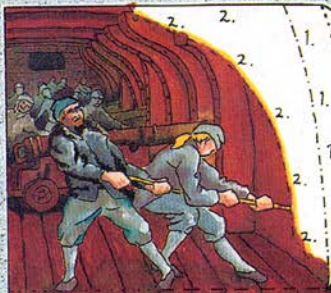

VASA 24-PUNDIG KANON

Skär två tändstickor.
